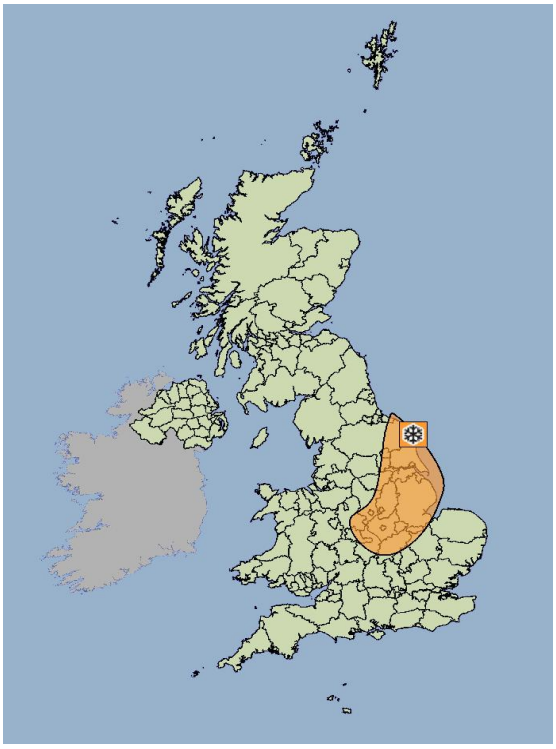
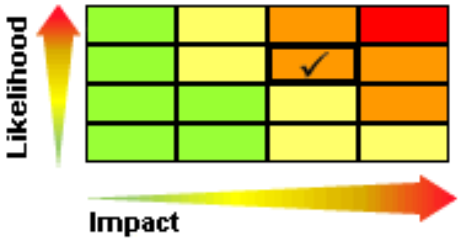
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
Further snow showers are expected through Tuesday, with the likelihood that a more organised area of snow will push southwest during the morning, bringing 5 to 10 cm of snow in places in just a few hours.

Strong winds may lead to drifting of lying snow (and severe wind chill) especially over hills, with lightning perhaps an additional hazard near North Sea coasts.

The Met Office have issued an **Amber Warning** of **Snow**

Valid from **04:00 on Tue, 27th Feb 2018** until **11:00 on Tue, 27th Feb 2018**

Snow showers or longer periods of snow are expected on Tuesday, accompanied by very low temperatures. The heaviest, most persistent snow looks likely to cross the area during the morning.

There is the likelihood of travel delays on roads, with some stranded vehicles and passengers, as well as delays or cancellations to rail and air travel. Some rural communities could become cut off. Power cuts may also occur and other services, such as mobile phones, may be affected.
